19. MH "Ethics+"
20. moral\* or ethic\*
21. sensitiv\* N5 patient\*
22. or/18-21
23. 14 and 17 and 22
24. Limit 24 by language (English) and date of publication (2011-2018)

- MH indicates the use of a subject heading from the controlled vocabulary.
- + indicates that the subject heading has been exploded, so that all narrower terms within the controlled vocabulary hierarchy are also included in the search.
- /ED shows that the subheading *Education* has been applied to the subject heading.
- \* indicates that the term has been truncated, so that the derivatives from the root word will be included in the search (e.g., simulat\* returns *simulate, simulated, simulating, simulation, simulations*, etc.).
- Quotation marks enclosing multiple words (e.g., "virtual reality") indicate the use of a phrase search.
