Licensing Considerations

• Licenses vary!
  – Some standard limitations:
    • only authorized users can access
    • cannot override DRM
    • no commercial use
    • no extensive or systematic downloading/copying
    • cannot remove/alter copyright, citation, or trademark info
    • some allowance for downloading and printing
  – COPPUL & CRKN consortial licenses among the best we have (e.g. Wiley, Elsevier)
    • more open, more Canadian-focussed
Licensing Considerations

• Things to look for:
  – Who are authorized users?
  – Use for education allowed, as well as personal and research use?
  – Can we use for ILL, coursepacks, e-reserves, Moodle, scholarly sharing?
  – Acknowledgment of non-USA use and law?
  – Are we granted perpetual access?
  – How many users allowed at a time?
  – Nonlinear lending?

Platform Usability Considerations

• What are the limits on printing/downloading?
• Check-out/download to e-reader options? (e.g., Ebrary)
• Format (PDF, ePUB, html)
• Log-ins required? Extra features with log-in?
• Usability
• Accessibility
• Publisher v. aggregator
Changes coming...

- Changes in DRM management
- E-book lending platforms for academic libraries (e.g., Overdrive; Lexis Nexis digital library)
- Academic press e-book aggregators (e.g., Project Muse, JSTOR)
- Standardization of e-book platforms
- Mergers & acquisitions (e.g., Proquest’s Ebrary absorbed EBL; Proquest took over MyiLibrary)
