

Markhor

Common Name:	Markhor
Scientific Name:	<i>Capra falconeri</i>
Animal Name (s):	Sproing, Cliff
Accession Number:	107234, 111490
Sex:	F, M
DOB:	12-May-05, 17-Aug-21
Target BW Range:	48 (F), growth (M)
Target Calories:	1.5-2.5% BW
Calories Provided:	
Avg. Intake (asfd)	1.8-4% BW

Diet:	Maintenance
Section:	ASIA
Standard diet for :	1
Total same species in Enclosure:	1.1

STANDARD DIET FOR:		1	ANIMAL	DATE:		17-Sep-23
Day		Food Type		Amount	g	Group (1.1) Amount
M	T W R F Sa Su	Winter Herbivore Pellet		1.5-3 cups	265-530	3-6 cups

M	T W R F Sa Su	Browse		as available		2nd priority browse species min 225g/day, 2.5% of forage

Notes: Diet is per animal. Group amount shown for 1.1.0

Hay and Pellet intake changes seasonally and is recorded daily on section, adjusted as needed.

Feed high quality hay (>50% alfalfa, CP>14%) over the winter (Nov to June), may reduce quality July to Oct (<50% alfalfa, CP 11-13%).

Remain on Winter Herb Pellet and WH+ year round

Produce is used for training and enrichment purposes, or medicating.

Breeding Season Jan (rut) - April, may reduce appetite and BCS.

Pregnant animals in 3rd trimester or lactating animals may receive upto 30% increase in pellet and hay components.

BCS assessed quarterly (May/Jun, Aug/Sept, Nov/Dec, and Feb/Mar)

Offer boost at 10% of diet for thin/geriatric animals (75-150g/d).

FEED AS INDICATED. DO NOT ALTER DIET. IF CHANGE IS REQUIRED PROVIDE DETAILS IN DIET CHANGE REQUEST.
