S	Romaine	0.25 hd	1.5hd for group
M T W R F S Su	Browse	as available	2nd priority species
	Edible Flowers	as available	250-500g/day, 2.5% of forage seasonal, by donation

Notes:
Diet is per animal. This is a Copper sensitive species, highly susceptible to Cu toxicity.
*Summer herbivore pellet April to Oct. Transition over 12 days 25:75 (4 days), 50:50 (4 days), 75:25 (4 days), 100%
*Winter herbivore pellet Nov to Mar. Transition over 12 days 25:75 (4 days), 50:50 (4 days), 75:25 (4 days), 100%
Consult animal nutrition supervisor for current mixed hay components and recommended amounts.
Recommended, 25% Alfalfa, 15-18%CP, 90% DMB
Pasture available in summer., hay may be reduced based on appetite and body condition
Adjust amount of herbivore pellets based on number of animals and stage of gestation or lactation (currenlty not breeding, all animals are related)
Difficult to enrich with food, as they are very picky. Scent enrichment is recommended.

FEED AS INDICATED. DO NOT ALTER DIET. IF CHANGE IS REQUIRED PROVIDE DETAILS IN DIET CHANGE REQUEST.
